DRAMATIC CLOUDS AND SNOW

Dramatic Clouds & Snow With Peddlers Den Stencils

www.peddlersden.com

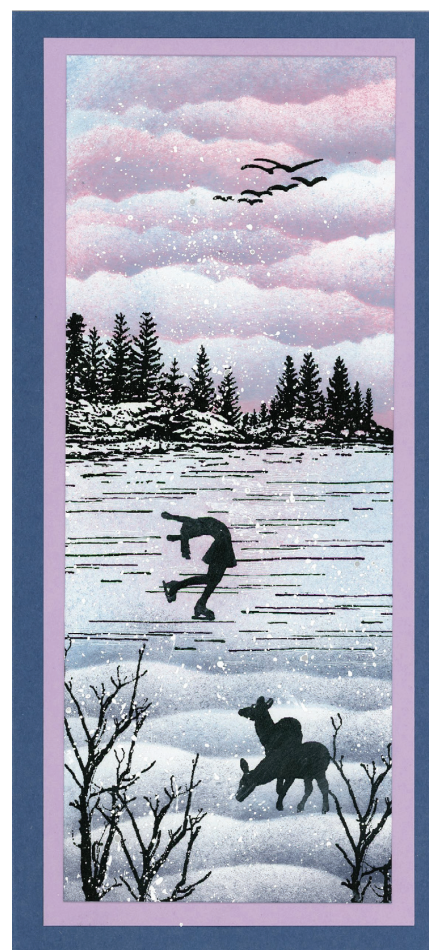

This kit features scenic elements stencils for clouds and snow. Depending on your preferences, you can make them dark and dramatic, or light and airy! Here are some examples.

My Favorite: Light, fluffy (airy) clouds and snow.

Deep, vibrant clouds and light, fluffy snow.

Deep, vibrant clouds and dramatic snow with splattered snow (Dr Ph Martin's bleedproof white)

This kit includes:

- 1 - pre-stamped "practice" blank.
- 1 - partially pre-stamped project blank.
- 1 - orchid layer (mat to frame your piece)
- 1 - blue cardstock base
- 1 - cloud stencil
- 1 - snow stencil
- 4 - rubber stamp images
- 1 - idea sheet with notes and instructions

You will want to trim your rubber as close to your images (within reason) as possible without nipping the image. This minimizes the risk of getting ink on the edges that may print.

We are using 100# semi gloss coated (both sides) card-stock. Because it is coated both sides, if you keep the back-side clean, you can use it, for either additional practice or a free "do-over". This is Peddlers Den house brand paper.

We provided a pre-stamped blank for your work along. Since time is short, we feel that you can work along, learning to use the stencils, without the pressure of rushing and making a fatal mistake! Later, when you are more comfortable and confident, you can use the partially stamped blank for your final project!

Proprietary material. Must not be reproduced or shared without written permission . copyright Peddlers Den Inc. ~ www.peddlersden.com

Instructions continued on next page →

Materials used that are not included in this kit:
Black ink pad (we recommend Memories or Stazon)
Makin' A Scene inks:

- Robin's Egg Blue
- Vintage Mauve
- Granite Gray (alternate Light Cool Gray)

Sponges

Scissors to trim your rubber

(optional: post-it note mask for branches tucked in snow)

Acrylic blocks and a way to hold rubber to block

(we recommend Grip-It)

Adhesive to assemble final card

Images used, but not included:

Rocky Shore T2-035F

Flock of Birds T2-040A

Additional papers are available for purchase separately.

Dr. Ph. Martin's bleed proof white can be used to block out errors, or to create splattered snow with the Tim Holtz splatter brush (all available through Peddlers Den).

INSTRUCTIONS:

Using the Project Blank, you will stamp the lines on the pond that indicate your ice. Add the Figure Skater in black. You can choose to either stencil the snow first, OR stamp your trees and deer first. Either works.

When stencilling the snow, we suggest using either Granite cool gray ink, OR Light cool gray ink. A pale gray or pale blue will give you the best results. Angle your stencils (like shown at right) to make interesting "natural" shapes. If you need to do a narrow sponge of color, PINCH the sponge to make the inked edge much narrower. This gives you a lot of control. I stencilled the edge of the snow using both robin's egg blue and granite gray. The duo of color adds a lot of depth. On the top edge, I even added a hint of the vintage mauve.

Once you have your snow stencilled, you may want to add some branches sticking up out of the snow or behind the snowbank.

Stencil your clouds. We used Robin's Egg blue, followed by Vintage mauve. When you mix blue and pink, you produce a lavender, giving the appearance of additional colors and shades.

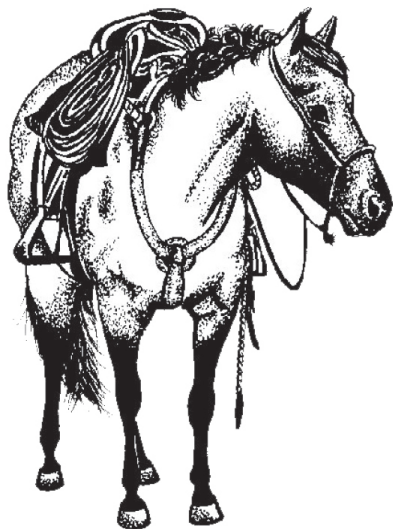

Optional: lightly sponge in a little color on your ice. This will tend to make your snow look whiter, or you can leave the ice the white of the paper. If you want to "splatter" snow, or if you need to insert some white highlights, or block out some unintended color, use Dr. Ph. Martin's bleed proof white (sold by Peddlers Den). To splatter, we sell the Tim Holtz splatter brush.

Variation:

Die cutting and layering can enhance your scene! Here we used the Creek Bank Creations Slim Oval Scallop dies. We stamped our Rocky Shore across the middle of the card, then our ice patterns, the figure skater and birds. It is fun to add the bare branched tree down the left side of the bottom of the card. We then stamped the deer. We then stencilled the snow and the sky, added some bare branches behind the deer, and this is the result.

Dies can be ordered at www.creekbankcreations.com. Coupon code RAINBOW offers 15% off.

YOU BRIGHTEN MY DAY

Instructions on next page →

Included in Your Project Kit:

- 8 1/2x11 white cardstock
- Colored cardstock square
- Adhesive runner
- Pop up foam squares
- Stickles glitter glue
- Ink pad
- Clear stamp set

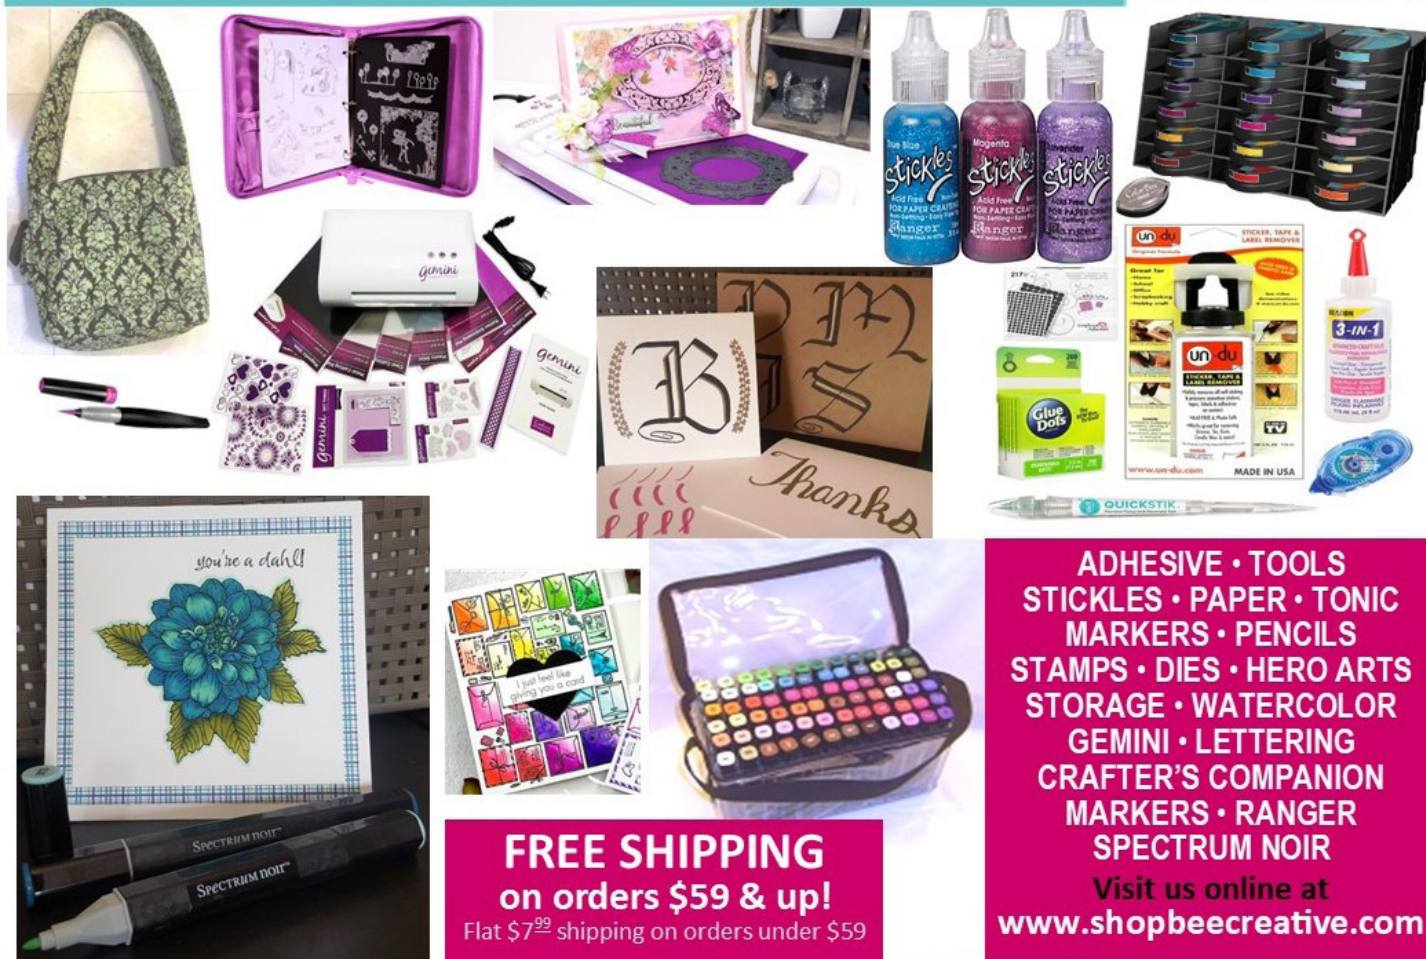

Instructions:

BASICS:

We will measure and cut down the white cardstock into a slimline card, leaving the excess for your stamped flowers. Stamp the flowers and color in. Fussy cut them out. Using the ink pad, blend or sponge on color to card base. Pop up flowers on top. Add tulle and ribbon. Stamp sentiment on white cardstock, trim, and mount on colored cardstock rectangle and pop up on card.

Bee sure to visit us at www.shopbeecreative.com for all your stamping and card making supplies and inspiration!

HAPPY HOLIDAYS

Instructions on next page →

HOLIDAY SCENE SLIMLINE CARD

WITH *right at home*

Step-by-Step Instructions:

- Start with the white cardstock panel that's slightly smaller than the cardfront. Using the Mini Cloud Border Stencil and a blending tool, sponge on blue ink to create a cloudy background. The stencil will only cover half of the panel width-wise, so once you reach the end of the stencil, slightly shift it to cover the rest the panel. Continue blending until you cover the entire panel with clouds. Set aside.
- Using scissors, cut a curved, sloped edge into the thin white cardstock strip. This will act as our snow bank. Set aside.
- Grab the die cut pieces from the glassine bag in the kit. Using the coordinating stamps from your stamp sampler and a black ink, stamp the images onto the die cuts. Color in your stamped images using your preferred coloring medium. Alcohol markers were used for the sample. Add white highlights using a gel pen. Set aside.
- Color the car, wheels, and tree die cuts using your preferred coloring medium as well. Add white highlights using a gel pen. Using a small scrap of white cardstock, color the entire piece the same color as your car wheels. Adhere this piece on the backside of the car, with the colored side showing through the car handles on the front of the car. See picture for reference. Set aside.
- Adhere your sloped, snow bank strip to the bottom edge of your cloud, ink-blended panel.
- Stamp the "Happy Holidays" greeting from the stamp sampler in the top, right-hand corner of the cloud panel. Color in the spaces between the letters, if desired, and add white highlights. Stamp "And A Merry New Year" along the bottom middle of the snow bank. Adhere this entire panel to the cardbase.
- Arrange your colored images and car pieces on the cardbase to create a festive, winter scene. Adhere the pieces in place using a variety of adhesives, some with dimension and some flat.
- Use the small snowflake images from the sampler stamp and a blue ink to add snowflakes to the background.
- Add clear glitter glue along the top of the snow bank and in the center of the stamped snowflakes to add a touch of dimension and sparkle. Set aside to dry.
- Grab the white slimline envelope included in the kit. Using the stripe stamp from the sampler stamp and a light green ink, stamp a border along the bottom of the envelope. Using the Santa, elf, reindeer, and present images, and various colors of ink, stamp a scene along the top of the border that mimics the cardbase design. Add the "Please Deliver To:" banner in the center of the envelope in a red ink and a flurry of snowflakes around it in a blue ink. On the back flap of the envelope, stamp the "Write More, Text Less" image and any additional decorations you desire.
- Once the glitter glue is done drying on your cardbase, you can stamp the "Handmade by me, for you, with love" image on the backside.

POETRY CARD & TAG

Instructions on next page →

Kit includes:

- 1-Judikins Slim Line Envelope Template
- 2- Printed Pages with multiple wording options(printed on thick cardstock)
- 1- Gelato (colors will vary 22 colors to be handed out)
- 1 Black Cardstock-base for card and tag
- 1- set of precut tags/3 sizes only using 1
- 2-Cardstock papers to coordinate with the Gelato color for making 2 envelopes

Learn how to make "Colored Out" poetry using a Gelato. Turn your artwork into a birthday card as well as a Thank you tag. Guest will have 6 extra "poetry" sayings to make more cards.

Guest needs:

Scissors and paper trimmer, Tape Runner or Double Sided Tape or Zig Two Way Glue, Pencil, Teflon Bone Folder, Ruler, Broad or Medium Tip Black Marker (or other color, extra fine tip not recommended), coordinating paper from your stash for background on tag and/or birthday card. From your stash-recommend contrasting your paper with your gelato color.

Optional: Ink, Finger Dauber, other embellishments

Before we start-two things to decide-

#1-your coordinating paper from your stash to use a 2.5"x6.5" piece.

#2-In the kit you have 2 cardstocks-both can be used for the envelopes, or one can be used for the envelope and the second one cut to a 3"x8" piece for a layering piece on the birthday card. OR you can use another paper from your stash-choose a coordinating color with your gelato color.

Start with cutting the black paper which is your base for both card and tag.

Turning paper on it's long 11" edge, measure out to 7.5" in length, dot with a pencil and cut. That piece is going to be your base for the birthday card, the other piece is the base for the tag.

Fold the 7.5" piece in half and leave vertical for the card.

Birthday Card

Cut a solid color or patterned paper to the size of 3"x8" and that will be the first layering piece on your birthday card.

Take your printed cardstock and cut out the first long piece block that states "Happy Birthday".

Take your black pen and circle the words "Happy" and "Birthday". If you want you can draw a line connecting the two. This area will not get the gelato coloring as this is the space that will be left to view.

Practice on another piece of paper before you do a gelato on your actual piece.

Taking your gelato, you can skim the rectangles or do straight lines, or apply how you wish. Take your finger dauber and run back and forth in the sections you want to be "colored out" so that only the words "Happy Birthday" show up more vividly.

After coloring how you wish, I flip it over on a blank paper and rub the card to get any excess coloring off the card.

Flip back over and feel free to ink the sides with ink, or take your gelato stick and run it along the sides. Do that over paper you want to discard as shavings sometimes come off.

Cut out a top sentiment-I choose "Wishing You" for the birthday card.

Can add gelato if you wish, can add a layering background as well.

Instructions continue on next page →

Now we layer!

Flip over your colored piece and apply glue and place where you want. Repeat with sentiment.

Now flip over the whole unit and apply glue and place on card.

Left to finish—inside sentiments as you wish, as well as can add wink of stella, rhinestones, stickers etc to embellish up your birthday card.

Thank you tag

Take your 3.5"x8.5" black piece, this is your tag base, set aside. Measure out a paper from your stash to 2.5"x6.5" to be the layering piece behind your thank you word set.

Working with the Thank you printed cardstock, cut out one of the rectangles that states "thank you".

Now we repeat circling with our black pen the words "thank you" that you want to highlight. The sample used 3, "thank", "thank you" and "thank" as well as drew a line to connect each of the words together.

Repeat gelato coloring.

Perhaps do this tag different than you did the birthday card with the coloring to try different techniques.

To layer-

Test before we glue-

Lay the largest pre-cut slim line die piece down to see where this is going to land. Your choice after it is adhered to cut along the bottom to give tag the curved look or leave on the flat paper piece.

Adhere pre-cut die piece. Glue colored thank you piece to the paper stash piece, check where to place before adhering into the tag piece.

This can be finished with another sentiment piece on top or leave as is. Can be embellished up as well.

Envelope for Slim Line Cards

This envelope template was especially made for these Slim Line cards, thank you Judkin's!

Fits an 8.5"x11" paper, or use a 12x12 as well.

Place on colored cardstock, trace, score and cut out. Fold along the lines and crease with bone folder. Before you glue, you can ink or ink with your gelatos the same way we inked with them before. Use finger dauber to finish it off or fingers.

Adhere the envelope closed and leave one flap open to mail your piece.

Enjoy a new way to use your gelatos!

LET YOUR LIGHT SHINE

Instructions on next page →

Supplies you will need to provide:

Paper of choice to stamp Gnome, Tree and Sentiment (Sample uses Neenah White Cardstock)

Stamping Ink (Black) of choice for the Gnome, Tree & Sentiments

Gold and Silver Metallic Gel Pens

White Gelly Roll Pen or similar

Gel Ballpoint style pens (from Dollar Stores) to color StarBright the Gnome and Flair felt tip pens. Colors of choice. I used light blue, purple, red, pink, green, light green, yellow. Flair in brown and teal.

Tape runner to assemble card

Pop dots or foam tape to attach Gnome & Sentiment

Acrylic Block for stamping the rubber stamps or Stamp Platform for easy Tree stamping

Envelope for the slimline (card 8 ½ by 3 ½ inches)

Inking brushes or daubers or make up sponges for stencil and background

Distress Inks or similar to use for Stars stencil: Bright Yellow

Post its or washi tape for stencil masking

Wet wipes or rag to clean your hands

Non-stick mat or board to craft on

Scissors for fussy cutting/trimming

Your kit includes:

StarBright Gnome cushion clinged rubber stamp 2 ¼ inches

Let Your Light Shine cushion clinged rubber stamp 1 inch

Large Tree cushion clinged rubber stamp 5 inches

Stars Stencil

Slimline card base folded size 8 ½ x 3 ½ inches

8x3 cardstock piece to create the background

If you have any questions, please email us at hello@blankpagemuse.com Thanks!

Step 1 Stamping the tree

The tree is stamped just off to the left side of the card. Leave some room on the right side.

Using the 8x3 piece of cardstock (it will be mounted later onto the folded card) stamp the large tree stamp in black. A stamping platform tool is helpful here for the large stamp. Ink and stamp, repeat as necessary if needed.

Use your silver gel metallic pen to make random silver dots on the tree branches.

Step 2 Stencil the stars

On the cardstock you just stamped the tree onto, add the stars.

Place the stars stencil at an angle with the smaller stars to the top left, use a soft touch and circular motion to apply the bright yellow color.

Brush from the outside edge inwards on each star you want, blending gently.

TIP:

Use small pieces of washi tape or a post it to mask any areas you don't want to get yellow onto. A small paper scrap also helps to keep your fingers clean.

Step 3

Once done creating the stars, place your stencil in the same spot and using your gold gel pen, scribble in some squiggly lines in each star.

Step 4

Using the same gold gel pen add a squiggly border line or lines all around the edge of the tree and stars background piece.

Step 5 Stamp the sentiment

Using your favorite white stamping paper, stamp the Let your Light Shine sentiment in black stamping ink. Trim the sentiment into a rectangular shape. Using the gold gel pen add a squiggly border all around it. Next using your silver gel pen add a dot in the center of each teeny snowflake.

Step 6 Stamp StarBright the Gnome

Using your favorite white stamping paper, stamp him in black ink.

Step 7 Color Starbright's Hat

Starting with the hat, I used Gel type ballpoint pens from a dollar store, Flair felt tip markers and a white Gelly Roll Pen.

Using the Flair marker create the base color along the edges of the hat left and right.

IMPORTANT Leave a center portion white to help create a highlight.

Next use a light color of gel ink(light blue) and using a flicking motion from the outside edge towards your white highlight start adding strokes of color on top of the Flair marker. Continue up both sides left and right. Let the strokes get closer to the center white highlight area.

Next use a darker blue or purple gel ink pen on top of these layers in the same manner. Last step for the hat using the white Gelly Roll pen, using the same flicking motion, add white over the previous colors, this will blend and tone down the colors. The center highlight will be white with some flecks of color.

Use your silver gel metallic pen to color the brim of the hat and add touches of silver to the stripes on the hat.

Step 8

Color his nose using red and pink. Blend with the white Gelly Roll.

Step 9

Color the lower parts of his beard “tufts” in silver.

Step 10

Color his robe. Start with light green and let it go up into his beard as needed. Add some darker green along the bottom and slightly upwards to the beard.

Color the stripes of his robe in red.

Color his shoes brown with small gold highlights.

Step 11

Take your scissors and fussy cut out the Gnome StarBright.

Tip:

Don't try to cut into the teeny spaces of his beard just go around them leaving the white paper. Then use a black pen all around to cover any white paper as needed.

Step 12

Attach StarBright and Let your Light Shine onto the background. You can use pop dots or tape runner to do this.

Step 13

Attach the completed background piece to the slimline card base with your tape runner or glue whichever you prefer.

Thanks so much for crafting with me today!
